

Djinn

Soulseek + MusicBrainz.

2023-05-29

Djinn downloads music from Soulseek and tags it with data from MusicBrainz. Djinn can download a single release, or an artist's entire discography.

Features

- Uses TagLib, eyeD3, and metaflac to tag MP3 and FLAC files.
- Automatically downloads cover art from MusicBrainz and Last.fm.
- Configurable directory and file names.

Examples

Download a single release:

```
djinn download --release 1b022e8e-4da6-4f9a-8f3d-3d3f2f0f3b6f
```

Download an artist's discography:

```
djinn download --artist 1b022e8e-4da6-4f9a-8f3d-3d3f2f0f3b6f
```

Download a single release, limiting downloads to .mp3 files, and replacing existing files:

```
djinn download --release 1b022e8e-4da6-4f9a-8f3d-3d3f2f0f3b6f --file-types .mp3 --replace
```
